## Standards of service to the public

Statistics Canada is committed to serving its clients in a prompt, reliable and courteous manner. To this end, Statistics Canada has developed standards of service that its employees observe. To obtain a copy of these service standards, please contact Statistics Canada toll-free at 1-800-263-1136. The service standards are also published on [www.statcan.gc.ca](http://www.statcan.gc.ca) under "Contact us" > "[Standards of service to the public.](#)"

## Note of appreciation

Canada owes the success of its statistical system to a long-standing partnership between Statistics Canada, the citizens of Canada, its businesses, governments and other institutions. Accurate and timely statistical information could not be produced without their continued co-operation and goodwill.

## Status

This standard was approved as a [departmental standard](#) on September 7, 2021.

## Preface

The Standard Geographical Classification (SGC) is Statistics Canada's official classification for geographic areas in Canada. The SGC covers all of the provinces and territories of Canada. The standard classification version of the SGC 2021 provides standard names and codes for the geographical regions of Canada, provinces and territories, census divisions (counties, regional county municipalities) and census subdivisions (municipalities). The names and codes for census metropolitan areas, census agglomerations, census metropolitan influenced zones, economic regions, North and South, census agricultural regions and census consolidated subdivisions are shown as the variants of SGC 2021.

The SGC was developed to enable the production of integrated statistics by geographic area. It provides a range of geographic units that are convenient for data collection and compilation, and useful for spatial analysis of economic and social statistics. The SGC is intended primarily for the classification of statistical units, such as establishments or households, whose activities are normally associated with a specific location.

The classification consists of two parts, volume I and volume II. Volume I describes the classification and related standard geographic areas and place names. The Introduction explains the changes between the 2021 version of the SGC and the 2016 version that impact upon the classification, such as changes in name, type or code, and indicates how the new and old codes relate to one another. Volume II contains reference maps showing the boundaries and locations of the geographic areas in the classification.

This update of the Standard Geographical Classification (SGC) 2021 was accomplished through the time, effort and co-operation of numerous people in the Statistical Geomatics Centre (SGC) at Statistics Canada.

## Introduction

### The Standard Geographical Classification 2021

The SGC enables the production of integrated statistics by geographic area. Established in the early 1960s, the Standard Geographical Classification was released as a working manual for 1964, 1966 and 1972. In 1974, the manual became an official publication of Statistics Canada and was subsequently issued for 1976, 1981, 1986, 1991, 1996, 2001, 2006, 2011 and 2016. This 2021 version is the eleventh (11th) edition.

### Conceptual framework and definitions

The SGC conforms to the basic principles of classification. It consists of a set of discrete units that are mutually exclusive and, in total, cover the entire universe. Usually, a classification appears as a hierarchy, each level of which satisfies the above-mentioned principles and is defined by the uniform application of a single criterion. Applied to geography, these principles result in a classification consisting of geographic areas whose boundaries are specifically delimited in accordance with well-defined concepts and which, in total, cover the entire landmass of Canada. The classification appears as a four-level hierarchy of geographic units identified by a seven-digit numerical coding system.

The SGC is one of a family of geographical classifications, approved and promoted by Statistics Canada. These geographical classifications provide the basic definitions of geographic areas which, when adopted for data collection and dissemination, result in statistics that are comparable among series and over time.

Two criteria were used in the selection of geographic units for the SGC. The first was that they be easily recognized by the respondents who are asked to report geographical detail. Administrative units were chosen because respondents routinely conduct business with administrative units such as a municipality, county or province.

The second criterion was the usefulness of the geographic units for general statistical purposes. Once again, administrative units were suitable because they are used by those establishing and implementing programs involving the expenditure of public funds and also because the general public can readily associate statistics on this basis with the names and boundaries of administrative units.

Geographic units range from the more detailed census subdivisions to the geographical regions of Canada. ‘Census subdivision’ is the general term for municipalities as determined by provincial or territorial legislation, or areas treated as municipal equivalents for statistical purposes. Municipalities are units of local government. The geographical regions of Canada are groupings of provinces and territories. The range of geographic units in this hierarchical classification allows for the publication of data at different levels of aggregation.

The SGC identifies the following four types of geographic units:

#### (1) Geographical region of Canada

The geographical regions of Canada are groupings of provinces and territories established for the purpose of statistical reporting. The six geographical regions of Canada are:

- Atlantic
- Quebec
- Ontario
- Prairies
- British Columbia
- Territories

#### (2) Province or territory

‘Province’ and ‘territory’ refer to the major political units of Canada. Canada is divided into 10 provinces and 3 territories. From a statistical point of view, province and territory are basic areas for which data are tabulated.

### (3) Census division (CD)

Group of neighbouring municipalities joined together for the purposes of regional planning and managing common services (such as police or ambulance services). These groupings are established under laws in effect in certain provinces of Canada. Census division (CD) is the general term for provincially legislated areas (such as county, municipalité régionale de comté (MRC) and regional district) or their equivalents. In other provinces and the territories where laws do not provide for such areas, Statistics Canada defines equivalent areas for statistical reporting purposes in cooperation with these provinces and territories. Census divisions are intermediate geographic areas between the province/territory level and the municipality (census subdivision).

### (4) Census subdivision (CSD)

Census subdivision (CSD) is the general term for municipalities (as determined by provincial/territorial legislation) or areas treated as municipal equivalents for statistical purposes (e.g., Indian reserves, Indian settlements and unorganized territories). Municipal status is defined by laws in effect in each province and territory in Canada.

In SGC 2021, there are 6 geographical regions of Canada, 10 provinces and 3 territories, 293 census divisions and 5,161 census subdivisions.

## Classification structure and codes

Each of the four levels of the classification covers all of Canada. They are hierarchically related: census subdivisions aggregate to census divisions, census divisions aggregate to a province or a territory which in turn aggregate to a geographical region of Canada. The relationship is illustrated in Figure 1.

Figure 1 Standard Geographical Classification hierarchy

This structure is implicit in the seven-digit SGC code as shown in the following illustration for the city of Oshawa.

### Code for the city of Oshawa

Region	PR	CD	CSD	Name
3				Ontario
	35			Ontario
	35	18		Durham (Regional municipality)
	35	18	013	Oshawa (City)

The region code is the first digit of the province and territory code. The code for the city of Oshawa is 3518013.

### The SGC coding system

At the outset, numerical codes were adopted for ease of use and clarity. The numbers were universally applicable to all of the data processing machines in use at that time.

The use of numerical codes continues but the number of digits in the code changed from six to seven in 1976, when a three-digit code was adopted for census subdivisions (CSDs) because the number of CSDs in one census division exceeded 99.

Provinces are numbered from east to west. Because the number of provinces and territories exceeded nine, a two-digit code was adopted. The first digit represents the geographical region of Canada in which the province or territory is located and the second digit denotes one of the 10 provinces and 3 territories. The codes for geographical regions of Canada are shown in Table A.

**Table A**  
List of geographical regions of Canada with codes, 2021

Code	Geographical region of Canada	Map
1	Atlantic	<a href="#">HTML</a>   <a href="#">PDF</a>
2	Quebec	<a href="#">HTML</a>   <a href="#">PDF</a>
3	Ontario	<a href="#">HTML</a>   <a href="#">PDF</a>
4	Prairies	<a href="#">HTML</a>   <a href="#">PDF</a>
5	British Columbia	<a href="#">HTML</a>   <a href="#">PDF</a>
6	Territories	<a href="#">HTML</a>   <a href="#">PDF</a>

The provincial and territorial codes are shown in Table B.

1. Canada Post, [Canadian provinces and territories](#) (accessed January 1, 2021).

2. International Organization for Standardization, [ISO 3166 code lists](#) (accessed January 1, 2021).

The following conventions are used in the coding system:

1. The codes usually follow a serpentine pattern beginning in the southeast corner of each province, territory or census division (CD). In this way, adjacent code numbers usually represent geographic units that share a common boundary. Exceptions are found in Saskatchewan and Alberta, where CDs are numbered in a straight line from east to west, returning to the eastern border when the western border is reached. Also, in Quebec, Saskatchewan, Alberta, and British Columbia, Indian reserve codes are included in the 800 series of numbers, whereas in the other provinces they are accommodated within the serpentine numbering pattern for census subdivisions (CSDs).
2. In order to provide the flexibility required to maintain the coding system, the numbering is not sequential (except for CDs, which are more stable). Gaps in the numbering sequence leave opportunities to incorporate new geographic units within the numbering sequence.
3. Codes are not generally used more than once. However, a code may be reused if at least two editions of the classification have been published since it was last used. For example, a code deleted in 2006 may be reused in 2021.
4. Component parts of codes are preserved as much as possible. For example, when a new CD is created, the original CSD codes are retained where possible.

## Naming geographic units

The following procedure is applied in selecting names for geographic units:

1. Official names are used where they are available. The names of incorporated local and regional municipalities are taken from provincial and territorial gazettes, where official notifications of acts of incorporation for new municipalities and changes to existing municipalities are published.
2. Most official names are accepted as published, but many are edited by Statistics Canada for the sake of consistency and clarity. For example, Statistics Canada drops the census subdivision (CSD) type and uses the geographical name only (i.e., the official name City of Ottawa appears in the SGC as Ottawa).

3. Six municipalities (i.e., CSDs) in Canada have different official names in English and French: Beaubassin East / Beaubassin-est, and Grand Falls / Grand-Sault in New Brunswick; and Greater Sudbury / Grand Sudbury, French River / Rivière des Français, The Nation / La Nation, and West Nipissing / Nipissing Ouest in Ontario. For English products, the official name in English is used (i.e., Greater Sudbury), for French products, the official name in French is used (i.e., Grand Sudbury), and for bilingual products, the bilingual name is used with English followed by French (i.e., Greater Sudbury / Grand Sudbury).
4. The convention for the naming of a census metropolitan area (CMA) or census agglomeration (CA) was based on the name of the principal [Population centre \(POPCTR\)](#) or largest city at the time the CMA or CA was first formed. This standard had been used since the 1971 Census. Through the years, the CMA and CA names have remained stable. The most important changes resulted from name changes to the CSDs (resulting from municipal dissolutions, incorporations and name changes). The key revision to the convention is the establishment of guidelines for CMA name change requests as described here: [Census metropolitan area \(CMA\) and census agglomeration \(CA\)](#).
  - ▶ CMA names can consist of up to three legislated municipal names of eligible census subdivisions (CSDs) that are components of the CMA. However, the number of name elements in any new CMA name request is limited to five. If any of the eligible CSD names are already hyphenated or compound, the number of CSD names will be limited to two or one if the number of name elements exceeds five.
  - ▶ The eligible municipal names include the historic central municipality name and the two component CSDs with the largest population, and having a population of at least 10,000, according to the last census.
  - ▶ The ordering of the municipal names within the CMA name is determined by the historic (central) municipality and the population size of the eligible CSDs. The first component of the CMA name is always the historic (central) CSD even if its census population count is less than the other eligible component CSDs. This ensures that CMA names retain a measure of stability for better longitudinal recognition. The second and third place name order is determined by population size. The component CSD with the higher census population count at the time of the name change assumes the second position and the next largest component CSD, the third position.
  - ▶ In order for a requested CMA name change to be implemented, there must be explicit consensus among all eligible component municipalities on a proposed new name and a formal request, in accordance with these guidelines, must be sent to the Director of the Statistical Geomatics Centre at Statistics Canada by June 1 of the year prior to the census. The CMA name change will be implemented in the revision of the Standard Geographical Classification related to the census under consideration.
  - ▶ Statistics Canada will continue to change CMA names whenever the legislated name of a municipality changes. Any other request for a name change will only be considered within the context of these guidelines.
5. The remaining sub-provincial geographical names are created by Statistics Canada in cooperation with provincial, territorial and federal officials, for example, when creating names for most economic regions (ERs).
6. Some statistical areas (e.g., CMAs and CAs) straddle provincial boundaries (e.g., the CMA of Ottawa–Gatineau). In such a case, when data are presented for the provincial parts, the name of the province must follow the name of the statistical area. For the CMA of Ottawa–Gatineau, each part of the CMA will be identified as Ottawa–Gatineau (Ontario part) and Ottawa–Gatineau (Quebec part).
7. Where the CD or CSD type (e.g., county, town, city) is part of the legal name of the CD or CSD as legislated by provincial or territorial governments, Statistics Canada uses the language form of the legal name. In all other cases, where the CD or CSD type is not embedded in the legal name, Statistics Canada uses the language of the publication. As a consequence, this means that in an English language publication there may be some French language type names, and that in French language publications there may be some English language type names. For example, in the case of Calgary, Alberta, the legislation specifies that the legal name is “City of Calgary”. Accordingly, the type is presented as City (CY) in English publications; City (CY) in French publications; and as City (CY) in bilingual publications.

Due to system constraints, Statistics Canada is unable to maintain certain characters within geographic names. This results in a difference between the official names and those used in census products. For example, the ER with the official name 'Campbellton–Miramichi' will be published as 'Campbellton--Miramichi'.

[Appendix A](#) and [Appendix B](#) provide the standard abbreviations and titles for all CD and CSD types for English, French and bilingual publications respectively.

## Changes to Municipal Boundaries, Status, and Names

This [Interim List of Changes](#) provides a summary of the changes to census subdivisions (CSDs) such as municipal boundary or name changes in effect between January 2, 2016, and January 1, 2021. This list presents the changes which have been processed by Statistics Canada based on the information received and, therefore, may not include all the changes that may have occurred in this time period.

The SGC 2021 presents standard geographic areas as of January 1, 2021. It includes any changes to municipalities, effective on that date or earlier, received by Statistics Canada before the spring of 2021.

Information received after the spring of 2021, has not been included, therefore provincial or territorial authorities may notice some small discrepancies compared to their official records.

Several hundred changes are made to CSDs every five years. These changes may affect boundaries, codes, names, or types. Changes to the census division level also occur periodically. Most changes originate from provincial legislation (revised statutes and special acts), changes to Indian reserves originate with Crown-Indigenous Relations and Northern Affairs Canada (CIRNAC); formerly Indigenous and Northern Affairs Canada (INAC), and other changes come from Statistics Canada.

Legislated changes are effective as of the date proclaimed in the legislation. Other changes are effective January 1, usually of the reference year for the SGC.

The Standard Geographical Classification is published every five years, coincident with the Census of Population. For most statistical applications, holding the geography in a statistical series constant for this length of time is an acceptable compromise between stability and existing reality. Observations at five-year intervals are suitable for historical trend analysis, yet for current series, a tolerable degree of distortion occurs.

## Classification structure

### Geographical region of Canada - 1 - Atlantic

Geographic unit	Code	Name	Type
Province (PR or Prov.)	10	Newfoundland and Labrador (N.L.)	
Census division (CD)	1001	Division No. 1	Census division (CDR)
Census subdivision (CSD)	1001101	Division No. 1, Subd. V	Subdivision of unorganized (SNO)
Census subdivision (CSD)	1001105	Portugal Cove South	Town (T)
Census subdivision (CSD)	1001113	Trepassey	Town (T)
Census subdivision (CSD)	1001120	St. Shott's	Town (T)
Census subdivision (CSD)	1001124	Division No. 1, Subd. U	Subdivision of unorganized (SNO)
Census subdivision (CSD)	1001126	Cape Broyle	Town (T)
Census subdivision (CSD)	1001131	Renews-Cappahayden	Town (T)
Census subdivision (CSD)	1001136	Fermeuse	Town (T)
Census subdivision (CSD)	1001140	Port Kirwan	Town (T)
Census subdivision (CSD)	1001144	Aquaforde	Town (T)
Census subdivision (CSD)	1001149	Ferryland	Town (T)
Census subdivision (CSD)	1001155	Division No. 1, Subd. W	Subdivision of unorganized (SNO)
Census subdivision (CSD)	1001169	St. Vincent's-St. Stephen's-Peter's River	Town (T)
Census subdivision (CSD)	1001174	Gaskiers-Point La Haye	Town (T)
Census subdivision (CSD)	1001178	St. Mary's	Town (T)
Census subdivision (CSD)	1001181	Riverhead	Town (T)
Census subdivision (CSD)	1001186	Admirals Beach	Town (T)
Census subdivision (CSD)	1001192	St. Joseph's	Town (T)
Census subdivision (CSD)	1001197	Mount Carmel-Mitchells Brook-St. Catherine's	Town (T)
Census subdivision (CSD)	1001203	Division No. 1, Subd. X	Subdivision of unorganized (SNO)
Census subdivision (CSD)	1001207	Colinet	Town (T)
Census subdivision (CSD)	1001214	Division No. 1, Subd. C	Subdivision of unorganized (SNO)
Census subdivision (CSD)	1001219	Branch	Town (T)
Census subdivision (CSD)	1001225	Point Lance	Town (T)
Census subdivision (CSD)	1001228	St. Bride's	Town (T)
Census subdivision (CSD)	1001234	Division No. 1, Subd. B	Subdivision of unorganized (SNO)
Census subdivision (CSD)	1001240	Placentia	Town (T)
Census subdivision (CSD)	1001254	Fox Harbour	Town (T)
Census subdivision (CSD)	1001259	Division No. 1, Subd. A	Subdivision of unorganized (SNO)
Census subdivision (CSD)	1001263	Long Harbour-Mount Arlington Heights	Town (T)
Census subdivision (CSD)	1001267	Southern Harbour	Town (T)
Census subdivision (CSD)	1001270	Arnold's Cove	Town (T)
Census subdivision (CSD)	1001274	Come By Chance	Town (T)
Census subdivision (CSD)	1001277	Sunnyside	Town (T)
Census subdivision (CSD)	1001281	Chance Cove	Town (T)
Census subdivision (CSD)	1001285	Norman's Cove-Long Cove	Town (T)
Census subdivision (CSD)	1001289	Chapel Arm	Town (T)
Census subdivision (CSD)	1001293	Division No. 1, Subd. Y	Subdivision of unorganized (SNO)
Census subdivision (CSD)	1001298	Whitbourne	Town (T)
Census subdivision (CSD)	1001304	Division No. 1, Subd. E	Subdivision of unorganized (SNO)
Census subdivision (CSD)	1001308	Whiteway	Town (T)
Census subdivision (CSD)	1001312	Heart's Delight-Islington	Town (T)
Census subdivision (CSD)	1001316	Heart's Desire	Town (T)
Census subdivision (CSD)	1001321	Division No. 1, Subd. F	Subdivision of unorganized (SNO)
Census subdivision (CSD)	1001325	Heart's Content	Town (T)
Census subdivision (CSD)	1001328	New Perlican	Town (T)
Census subdivision (CSD)	1001332	Winterton	Town (T)
Census subdivision (CSD)	1001335	Hant's Harbour	Town (T)
Census subdivision (CSD)	1001339	Division No. 1, Subd. G	Subdivision of unorganized (SNO)
Census subdivision (CSD)	1001343	Old Perlican	Town (T)
Census subdivision (CSD)	1001347	Bay de Verde	Town (T)
Census subdivision (CSD)	1001352	Small Point-Adam's Cove-Blackhead-Broad Cove	Town (T)
Census subdivision (CSD)	1001357	Division No. 1, Subd. H	Subdivision of unorganized (SNO)
Census subdivision (CSD)	1001361	Salmon Cove	Town (T)
Census subdivision (CSD)	1001365	Victoria	Town (T)
Census subdivision (CSD)	1001370	Carbonear	Town (T)
Census subdivision (CSD)	1001374	Division No. 1, Subd. I	Subdivision of unorganized (SNO)
Census subdivision (CSD)	1001375	Bryant's Cove	Town (T)
Census subdivision (CSD)	1001379	Harbour Grace	Town (T)
Census subdivision (CSD)	1001385	Upper Island Cove	Town (T)

Geographic unit	Code	Name	Type
Census subdivision (CSD)	1001391	Division No. 1, Subd. J	Subdivision of unorganized (SNO)
Census subdivision (CSD)	1001394	Bishop's Cove	Town (T)
Census subdivision (CSD)	1001396	Spaniard's Bay	Town (T)
Census subdivision (CSD)	1001405	Division No. 1, Subd. K	Subdivision of unorganized (SNO)
Census subdivision (CSD)	1001409	Bay Roberts	Town (T)

## Variants of the SGC 2021

Although the SGC is the basic system of geographic units used for collecting and disseminating statistics in Statistics Canada, it cannot serve all statistical purposes for which the presentation and analysis of economic and social data are required. Other geographic units that are based on aggregations of the SGC geographic units are included as classification variants of the SGC.

Each classification variant of the SGC is a set of customized groupings that use SGC's census subdivisions as building blocks. In Statistics Canada, variants are created and adopted in cases where the version of the classification does not fully meet specific user needs for disseminating data or for sampling in surveys. A classification variant is based on a classification version such as SGC 2021. In a variant, the categories of the classification version are split, aggregated or regrouped to provide additions or alternatives (e.g., context-specific additions) to the standard structure of the base version.

Five classification variants have been recognized as part of the SGC 2021:

### **Variant of Standard Geographical Classification (SGC) 2021 for Statistical area classification**

This [classification variant](#) provides standard names and codes for census metropolitan areas, census agglomerations and census metropolitan influenced zones. It shows the hierarchical relationship between these geographic areas and census subdivisions (municipalities).

#### **Additional Information**

The [Statistical Area Classification \(SAC\)](#) - Variant of SGC 2021 groups census subdivisions (CSDs) according to whether they are a component of a census metropolitan area (CMA), a census agglomeration (CA) or a census metropolitan influenced zone (MIZ).

CSDs form the lowest level of this classification variant. The next level of this classification variant consists of individual CMAs, CAs and MIZs. The highest level of this classification variant consists of three categories that cover all of the landmass of Canada:

- CMAs (Canada)
- CAs (Canada)
- Outside CMAs and CAs, also known as the MIZs (Canada)

The SAC provides unique numeric identification (codes) for these hierarchically related geographic areas. It was established for the purpose of reporting statistics. The hierarchical relationship of the geographic areas is shown in Figure 2.

**Figure 2 Statistical Area Classification - Variant of SGC 2021**

### Census metropolitan area and census agglomeration

A [Census metropolitan area \(CMA\)](#) and [census agglomeration \(CA\)](#) is formed by one or more adjacent municipalities centred on a [Population centre \(POPCTR\)](#) (known as the core). A CMA must have a total population of at least 100,000, based on data from the current Census of Population Program, of which 50,000 or more must live in the core based on adjusted data from the previous Census of Population Program. A CA must have a core population of at least 10,000, also based on data from the previous Census of Population Program. To be included in the CMA or CA, other adjacent municipalities must have a high degree of integration with the core, as measured by commuting flows derived from data on place of work from the previous Census Program.

### Census metropolitan influenced zone

The Census metropolitan influenced zone (MIZ) is a concept that geographically differentiates the area of Canada outside census metropolitan areas (CMAs) and census agglomerations (CAs). Census subdivisions (CSDs) within provinces that area outside CMAs and CAs are assigned to one of four categories according to the degree of influence (Strong, moderate, weak or no influence) that the CMAs or CAs have on them. CSDs within the territories that are outside CAs are assigned to a separate category.

All of the landmass of Canada outside CMAs and CAs are classified by the five MIZ in the classification variant. For example, all areas in Canada with no metropolitan influence are classified as “No metropolitan influenced zone (Canada)”. Where “Canada” appears in brackets, it may be omitted when the context provides clarification.

### The coding structure

Each of the three levels of the classification variant covers all of Canada. For the first level consisting of the census metropolitan categories, an alpha code has been introduced:

- A: Census metropolitan areas (CMAs) (Canada)
- B: Census agglomerations (CAs) (Canada)
- C: Outside CMAs and CAs, also known as the census metropolitan influence zones (MIZs) (Canada)

In the second level, three-digit numeric codes are used for individual CMAs, CAs and MIZs.

The codes for a CMA, a CA and a MIZ are shown in the following illustration:

#### **Codes for a CMA, a CA and a MIZ**

Census metropolitan category	CMA/CA/MIZ code	Name
A	001	St. John's
B	015	Corner Brook
C	996	Strong metropolitan influenced zone (Canada)

The last level consists of the census subdivision codes as described in the classification version. Each census subdivision is part of a CMA, a CA or is categorized as part of a MIZ.

#### **Variant of Standard Geographical Classification (SGC) 2021 for Statistical area classification by Province and Territory**

This [classification variant](#) provides standard names and codes for census metropolitan areas (CMAs), census agglomerations (CAs) and census metropolitan influenced zones (MIZs) by province and territory. It shows the hierarchical relationship between these geographic areas and census subdivisions (municipalities). This classification variant also shows the hierarchical relationship between the geographical regions of Canada, provinces and territories, CMAs, CAs and MIZs.

#### **Additional Information**

The [Statistical Area Classification \(SAC\)](#) by Province and Territory is a variant of the [Standard Geographical Classification \(SGC\)](#). [Census subdivision \(CSD\)](#) form the lowest level of this classification variant. This classification variant is based on the “Statistical Area Classification - Variant of SGC 2021”, but with two additional levels in the hierarchy of the classification:

- Geographical regions of Canada
- Provinces and territories

This allows for the classification of the census metropolitan categories, the census metropolitan areas, census agglomerations and census metropolitan influenced zones, by provincial and territorial parts. The hierarchical structure of the classification is shown in Figure 3.

**Figure 3 Statistical Area Classification by Province and Territory - Variant of SGC 2021**

A provincial or territorial part designation is included with the name of the census metropolitan category by province and territory. For example, under the province of Manitoba, the three categories of this level are:

- Census metropolitan areas (Manitoba)
- Census agglomerations (Manitoba)
- Outside census metropolitan areas and census agglomerations (Manitoba)

Individual geographic units by province are presented for the census metropolitan areas (CMAs) and census agglomerations (CAs) by province. This is useful for the separate analysis of one CMA and three CAs that have provincial parts. The codes and names of the provincial parts of the CMAs and CAs are:

- 24 505 Ottawa–Gatineau (Quebec part)
- 35 505 Ottawa–Gatineau (Ontario part)
- 13 330 Campbellton (New Brunswick part)
- 24 330 Campbellton (Quebec part)
- 24 502 Hawkesbury (Quebec part)
- 35 502 Hawkesbury (Ontario part)
- 47 840 Lloydminster (Saskatchewan part)
- 48 840 Lloydminster (Alberta part)

The census metropolitan influenced zones by province and territory are also presented as provincial and territorial parts. For example, under the province of Quebec, the categories are:

- Strong metropolitan influenced zone (Quebec)
- Moderate metropolitan influenced zone (Quebec)
- Weak metropolitan influenced zone (Quebec)
- No metropolitan influenced zone (Quebec)

## Variant of Standard Geographical Classification (SGC) 2021 for Economic Regions

This [classification variant](#) provides standard names and codes for economic regions. It shows the hierarchical relationship with their component census divisions and census subdivisions by province and territory.

### Additional Information

An [Economic region \(ER\)](#) is a grouping of complete [Census division \(CD\)](#) (with one exception in Ontario) created as a standard geographic unit for analysis of regional economic activity.

Such a unit is small enough to permit regional analysis, yet large enough to include enough respondents that, after data are screened for confidentiality, a broad range of statistics can still be released.

The regions are based upon work by Camu, Weeks and Sametz in the 1950s. At the outset, boundaries of regions were drawn in such a way that similarities of socio-economic features within regions were maximized while those among regions were minimized. Later, the regions were modified to consist of counties which define the zone of influence of a major urban centre or metropolitan area. Finally, the regions were adjusted to accommodate changes in CD boundaries and to satisfy provincial needs.

An ER is a geographic unit, smaller than a province, except in the case of Prince Edward Island and the Territories. The ER is made up by grouping whole CDs, except for one case in Ontario, where the city of Burlington, a component of Halton (CD 35 24), is excluded from the ER of Toronto (ER 35 30) and is included in the Hamilton–Niagara Peninsula ER (ER 35 50), which encompasses the entire census metropolitan area of Hamilton.

ERs may be economic, administrative or development regions. Within the province of Quebec, economic regions are designated by law (*les régions administratives*). In all other provinces, economic regions are created by agreement between Statistics Canada and the provinces concerned.

There were 76 ERs in 2021. ERs are listed with their component CDs.

**Figure 4 Economic Regions - Variant of SGC 2021**

### **Variant of Standard Geographical Classification (SGC) 2021 for Agricultural Regions**

This [classification variant](#) provides standard names and codes for census agricultural regions. It shows the hierarchical relationship with their component census divisions, census consolidated subdivisions and census subdivisions by province and territory.

#### **Additional Information**

[Census agricultural regions \(CARs\)](#) and [Census consolidated subdivision \(CCSs\)](#) are used by the Census of Agriculture for disseminating agricultural statistics. A CAR is composed of groups of adjacent census divisions (CDs). A CCS is a group of adjacent census subdivisions (CSDs) within the same CD.

For 2021, two changes to the composition of CARs were made to allow for the creation of this variant:

1. CARs are now defined for the territories
2. In Saskatchewan, CARs now respect CD boundaries.

There were 72 CARs in 2021. CARs are listed with their component CDs.

For 2021, many smaller 2016 CCSs have been amalgamated in order to create contiguous areas and reduce data suppression. CCSs are listed with their component CSDs.

**Figure 5 Agricultural Regions - Variant of SGC 2021**

### **Variant of Standard Geographical Classification (SGC) 2021 for North and South**

This [classification variant](#) provides a definition of the North and South of Canada. It shows the hierarchical relationship with their component census divisions and census subdivisions by province and territory. This variant was originally developed for the analysis of justice statistics.

#### **Additional Information**

North and South is defined as a variant of SGC. The definition of the North is the one used by the Conference Board of Canada's Centre for the North, based on the Northern Development Ministers Forum definition. In this definition, the North is broadly defined as the three territories and the northern extent of Newfoundland and Labrador, Quebec, Ontario, Manitoba, Saskatchewan, Alberta and British Columbia. North is based on provincially determined definitions that generally reflect administrative regions.

This variant was originally developed for SGC 2011 for the analysis of justice statistics. It is recommended for use by other program areas at Statistics Canada should it meet their needs, but there is no requirement for it to be used outside of the Canadian Centre for Justice Statistics.

## Notations

In this variant of SGC 2021 for North and South, the notations “N” and “S” are used in the numbering system. Codes ending with the letter “N” refer to groupings that are different from those of SGC 2021 because they only contain the northern part of the province. Codes ending with the letter “S” refer to groupings that are different from those of SGC 2021 in that they only contain the southern part of the province. Codes that have neither an “N” nor an “S” are precisely the SGC 2021 codes.

## Presentation of classification and related maps

The Standard Geographical Classification (SGC) 2021 is divided into two separate products:

- [SGC - Volume I, The Classification](#), Catalogue no. 12-571-X
- [SGC - Volume II, Reference Maps](#), Catalogue no. 12-572-X

The basic presentation of the classification with tables illustrating the classes is available in Volume I. Maps illustrate the boundaries of individual geographic areas effectively describing the class boundaries of each class in the classification. Maps are included in Volume I and Volume II of the classification.

### Volume I, The Classification

[Volume I](#) is the basic presentation of the system of geographic units. It describes the SGC 2021 consisting of the four levels of geographic areas:

1. Geographical region of Canada
2. Province or territory
3. Census division
4. Census subdivision

The SGC is the centrepiece of the classification, providing a complete list of its geographic units. These units are the building blocks for all other standard geographic areas. The SGC provides a code, name and type for each census subdivision (CSD).

Volume I also describes the [classification variants](#) that present census metropolitan areas (CMAs), census agglomerations (CAs), census metropolitan influenced zones (MIZs), economic regions (ERs), North and South, census agricultural regions (CARs) and census consolidated subdivisions (CCSs) and displays them in a variety of configurations for easy access and understanding. The introductory text explains the background and context for using standard geographic units.

### Volume II, Reference Maps

This [product](#) contains a series of twenty-three maps depicting the boundaries in effect on January 1, 2021, for census divisions (CDs), census subdivisions (CSDs), census metropolitan areas (CMAs), and census agglomerations (CAs). The boundaries are plotted on base maps, showing water features. The maps identify each CSD by name and code, and CDs and CMAs/CAs by code.

Also included are four maps of Canada, which illustrate:

1. The boundaries of CDs
2. The locations of CMAs and CAs
3. The spatial distribution of CSDs among CMAs, CAs, census metropolitan influenced zones (MIZs), and territories
4. The boundaries of economic regions with their component CDs

An index to CD and CSD reference maps is also included.

## Appendices

### Appendix A Standard abbreviations and titles for census division types for use in English, French and bilingual publications, 2021

Language form of census division type	Abbreviation for English language publications	Title for English language publications	Abbreviation for French language publications	Title for French language publications	Abbreviation for bilingual publications	Title for bilingual publications
